## Technical leaflet

### Egger Eurodekor melamine-faced chipboard

Material description:

surface texture synchronised with the printing cylinder of Gladstone Oak.

### Surface texture: ST28 Feelwood Nature

#### Description

The very deep, sandblasted appearance of these decors is revealed in particular by the section florets and scattered knots. The planked character, especially in the Grey Beige Gladstone Oak hue, exhibits a modern mix of grey and natural shades that combine extremely well.

The **ST28 Feelwood Nature** synchronised pore texture is particularly well suited for the following Gladstone Oak decors:

- H3309 – Sand Gladstone Oak
- H3325 – Tobacco Gladstone Oak
- H3326 – Grey Beige Gladstone Oak
- H3335 – White Gladstone Oak
- H3342 – Sepia Gladstone Oak

#### Special features

**ST28 Feelwood Nature** is synchronised with the printing cylinder of Gladstone Oak and emphasises the sandblasted character of the oak decor.
